

Its straightforward operation and pre-programmed standard working scenarios make it the perfect solution.

**LED-LIFT**

**TECHNICAL SPECIFICATIONS**

- LED screen meets the EN12966 standard: 80x80 pixel, 20 mm pitch LED display
- Maintenance-free mast
- Steel parts are standard galvanised
- Power supply: 24 Vdc with 2x 100 A battery bank
- Light sensor for automatic brightness adjustment
- Easy to operate via integrated touchscreen
- Easily accessible and programmable via Verdegro's Mobilityplanner (optional)
- Requires a mandatory VPN SIM card to operate on Verdegro's secure VPN

**VERDEGRO'S LED-LIFT**

The Verdegro Truck Mounted Attenuator (TMA) with elevated signaling offers a cutting-edge solution for enhancing safety and visibility on the road. When combined with the hydraulic LED-Lift mast (add-on), the system can achieve an impressive working height of up to 7 meters, ensuring that signals are clearly visible to approaching traffic from a distance.

The integrated LED display is fully compliant with the EN12966 standard, providing high-quality, reliable signaling under all conditions. The hydraulic LED-Lift elevates both safety and operational effectiveness, making it easier to manage traffic and protect work zones.

This compact and versatile system is designed to improve efficiency in a wide range of scenarios, from routine traffic management to emergency response operations. By combining robust engineering with advanced technology, the Verdegro TMA with LED-Lift mast ensures optimal performance while meeting the strictest safety standards, giving operators confidence and peace of mind on every deployment.

LED-LIFT (ADD-ON)
