- Integrated indicator light on the remote control

**TRUCK LIGHT TOWER INTRODUCTION**

The Verdegro Truck Light Tower (TLT) is designed to work seamlessly with your Truck Mounted Attenuator (TMA), providing powerful illumination for your work zone. Equipped with two 100 W floodlights mounted on a mast that extends up to 4 meters, the TLT ensures excellent visibility and enhanced safety during night operations or low-light conditions.

Operation is simple and safe thanks to remote-controlled functionality directly from the truck cabin. For extended use, additional batteries can be integrated into the system.

Our Truck Light Tower combines convenience, performance, and reliability—making it an ideal solution for efficient and well-lit roadwork environments. For more information or custom options, please contact our sales department.
